

# Wheel Seals

**Protect your bearings from contamination and water with the innovative Wheel Seal.**

SKF utilizes decades of bearing sealing experience to provide a solution that gives the ultimate riding experience with reduced friction, increased service intervals and longer bearing life.

F = FRONT

R = REAR

## Benefits

- Increased sealing efficiency
- Reduced friction and power loss
- Ideal running surface and sealing performance
- Superior contamination protection
- Longer bearing life
- Resistance to high pressure water wash
- Longer service intervals
- Overall higher reliability
