SKF Seal Kits consist of one oil seal and wiper made of self-lubricating compounds developed to achieve superior sealing performance.

- Reduces friction by 20% over standard seals
- Increased seal life
- Compatible with a wide range of (OEM) oils
- Withstands extreme conditions
- Maintains low and consistent friction
- Reduced wear and air suction

SKF Seal Kits consist of one oil seal and wiper made of self-lubricating compounds developed to achieve superior sealing performance.

- Reduces friction by 20% over standard seals
- Increased seal life
- Compatible with a wide range of (OEM) oils
- Withstands extreme conditions
- Maintains low and consistent friction
- Reduced wear and air suction

SKF Seal Kits consist of one oil seal and wiper made of self-lubricating compounds developed to achieve superior sealing performance.

- Reduces friction by 20% over standard seals
- Increased seal life
- Compatible with a wide range of (OEM) oils
- Withstands extreme conditions
- Maintains low and consistent friction
- Reduced wear and air suction

SKF Oil Seal Only Kits consist of one BLACK oil seal made of self-lubricating compounds developed to achieve superior sealing performance.

- Reduces friction by 20% over standard seals
- Compatible with a wide range of (OEM) oils
- Withstands extreme conditions
- Reduced wear and air suction

Under extremely muddy conditions, the mud scraper prevents dirt from entering the fork, enhancing the fork seal life and the performance of the other fork components.

- Withstands UV-light
- Effectively cleans dried mud from the stanchion
- Enhanced water and dirt protection
- Easy assembly and removal "in-field", no dismantling of the fork or wheel necessary

The SKF Glide Kit replaces the stock cartridge rod seals and air divider piston seals in the Showa SFF-Air TAC forks.

- Less seal drag (friction)
- Reduced friction allows for better damping, making the forks more responsive to clicker settings
- Virtually eliminates stick/slip
- Better small bump absorption during braking
- Less arm pump and smoother feel

The Shock Seal Head Unit 2.0 provides reliable sealing for high-performance suspension components.

- Fully integrated one-part solution
- Rebound bumper and mating plate provides smoother kick back and longer service life
- Plastic back-up ring reduces friction and wear
- Static outer diameter seal design allows easier assembly and removal

The Floating Piston from SKF replaces conventional solutions that typically consist of multiple parts with one single unit.

- Metal stamping and specifically developed rubber compound
- External sealing lips with reduced friction provide virtually no stick and slip effects
- Central membrane function to compensate for small vibrations without the need for the piston

SKF Fork Seal Kits for mountain bikes are made of the same self-lubricating compound developed for superior sealing performance in motorcycle applications.

- Compatibility with a wide range of original equipment and aftermarket fork oils
- Enhanced water and dirt protection
- Capability to withstand UV light
- Reduced wear and air suction for longer life
